OSAO, Kaukovainio Unit
01/2016–01/2018

SKILLS

Programming Languages

- Python, C/C++, Java, C#

Web & Mobile Development

- React, React Native, JavaScript, Node.js
- REST APIs, HTML5, CSS3

Platforms and Databases & Networking

- Windows, Android, Linux
- SQL, MySQL
- TCP/IP, IP Networking, Network Troubleshooting

Development Tools

- Git, Gerrit, GitHub
- Jira, Confluence
- Visual Studio, Android Studio

Testing & Automation

- NI TestStand, NI LabVIEW, Robot Framework

Solution-oriented software development and testing professional with a strong background in test automation, embedded systems, and device-level testing. Experienced in building software and automation tools, analyzing complex system behavior, and troubleshooting issues across application, operating system, and device layers. My development background also extends to web and mobile applications, APIs, databases, and backend functionality, providing a broad understanding of modern software systems. I am comfortable turning technical requirements and identified needs into practical, maintainable implementations. I combine analytical problem-solving with a hands-on engineering approach, with a strong focus on quality and reliability. I adapt quickly to new technologies and work effectively both independently and within multidisciplinary development teams.

WORK EXPERIENCE

Junior Software Developer

Aava Mobile Oy, Oulu | 04/2024-12/2025

- Developed and maintained test software used at the company's service centers for Android and Windows tablet devices to validate device functionality and identify faults at both hardware and system levels.
- Owned the commissioning, configuration and maintenance of test stations, including hardware integration, software deployment, environment setup and end-to-end system verification.
- Designed and implemented new testing processes with engineering teams to support new device variants and improve test reliability.
- Provided remote technical support to service centers by analyzing test failures, troubleshooting software and system issues, and guiding issue resolution across testing workflows.

Sales Assistant

Glitter Oy, Oulu | 06/2018-04/2024

- Managed customer service, sales and cashier operations while maintaining store presentation, visual standards and campaign execution.
- Served as Deputy Store Manager in 2021, taking full operational responsibility during holiday periods.
- From 2018 to 2021, alongside my sales role, I worked in B2B, where I was responsible for client-store visual merchandising, inventory order planning, product placement, and delivery handling.

Sales Assistant

H&M / Hennes & Mauritz Oy, Oulu | 04/2023-08/2023

- Handled daily customer service and cashier operations, delivery processing, product availability, store presentation, and merchandising updates.
